Press release, Imst 2022

medalp – high levels of medical competence at our five locations in the Tyrolean Alps

medalp is known for its expertise in the fields of sports trauma, trauma surgery, orthopaedics and rehabilitation at four of our locations in Tyrol.

With more than 3,000 surgeries per year, our highly experienced, competent and well-coordinated team is serving patients every day.

Since its foundation in 2002, holiday guests and locals alike have placed their trust in the services of medalp.

Around 200 specialists from various disciplines, from friendly receptionists through to trauma surgeons, orthopaedic doctors and physiotherapists, work closely together and help patients to quickly regain their mobility and performance. To ensure rapid rehabilitation, many minimally invasive surgical interventions can be performed using arthroscopy, i.e. joint endoscopy with a camera.

„With these methods, our medical staff can get an excellent overview of the type of injury while also carrying out the necessary treatment steps,“ explains Dr. Schahin Dehbalaie, Medical Director of medalp Imst and experienced surgeon.

From initial care and diagnosis to medical treatment and rehabilitation, medalp is the first point of contact for injuries and pain in the musculoskeletal system.

Medical services in the fields of trauma surgery, orthopaedics and sports medicine are offered at four locations in Tyrol:

- Care and treatment of all fresh injuries
- Treatment of fresh and old sports injuries
- Reconstructive surgery of all injuries of the musculoskeletal system
- Arthroscopic surgery of the shoulder, elbow, knee joint, wrist and ankle joint
- Orthopaedics

Medalp at a glance:

- Vast experience thanks to 3,000 surgeries per year
- State-of-the-art technology and highly qualified staff
- Quick and competent treatment on the same day
- State-of-the-art diagnostics – MRI, CT, X-ray
- Physical therapy and special underwater treatments
- Training supervision, supervision of competitive athletes and teams
